ABOUT ME

Professional Summary: Senior Design Manager with 12+ years of UX/product design experience, 6+ years leading design teams up to 20 members. I have served major technology companies and international product teams, including Meituan, Alibaba, Taobao/Tmall, Lazada, and SAP. I specialize in building design systems and high-performance design teams from the ground up (from "0 to 1"), having led design teams at Meituan (12–20 members) and Alibaba (6 members), and lead the transition toward AI-driven design practices. I excel at leveraging data to quantify design value—achieving improvements of over 30% in CSAT, over 50% in team efficiency, and a 50% increase in design asset reusability. Possessing both a global perspective and a design methodology tailored for the AI era, I have led the end-to-end establishment of design systems—as well as team management—for B2B SaaS platforms, consumer-facing Mini Programs, and AI-powered smart products. My expertise spans the entire design management lifecycle, from strategic formulation to frontline execution.

WORK EXPERIENCE

2023.01 - present	Design Manager	Meituan	3 years
Team Management: Led 12–20 members design team transition from traditional delivery to AI-driven design operations, establishing an AI-augmented workflow that doubled per-person design output and cut labor costs by 30%, completing AI design tool chain upgrade within 6 months. Design Systems: Owned intelligent design for restaurant SaaS products, AI assistant products, consumer Mini Programs, B2B PC, POS, and APP, covering 10+ product lines. Multi-platform design system with AI-ready architecture: 50% design asset reusability. Business Enablement: Led experience optimization for Meituan merchant Mini Programs, Manager APP, PC, and POS. Established enterprise client customization design service. Achieved 30% satisfaction increase, 20% ticket volume reduction, 120% annual renewal rate, and exceeded yearly OKRs. International Expansion: Built overseas design team and international design system from scratch for Meituan SaaS, covering North American merchants. Overseas NPS reached +40, UX scoring aligned with regional leading competitors.			
2017.09 - 2023.01	Design Leader	Alibaba	6 years
Team Management: Led a 6–person design team, overseeing talent development, design training, and the end-to-end performance management. Achieved 50% annual promotion rate (3 members promoted to P6/P7) with 100% retention. Design Systems: Spearheaded the creation of the ASCP Design System 3.0 from the ground up, covering over 10 core products including ERP, OMS, and SaaS. Increased design asset reusability by 50% and reduced the duration of			

individual product iterations by 3 days.

- **Business Enablement:** Responsible for Tmall's Digital Supply Chain products; led experience optimization initiatives for core products such as SaaS, OMS, and AEM. Established a closed-loop Customer Experience Management (CEM) mechanism, resulting in a 30% increase in CSAT scores and driving the over-fulfillment of key business metrics.
- **International Expansion:** Developed customized, localized design solutions for Southeast Asian markets—including Lazada and Daraz—spanning 8 countries and regions. Overseas NPS reached +35, surpassing domestic business.
